

Individual Project Reporting Sheet

Student Details

Name: Muhamad Faruki Bin Ramly	Section:3	Date:8/01/2021
Topic: Event management	Group Name: Socker4U	

Implementation Details

<i>What do I know about the project? (Project information and its functionalities)</i>	<i>Which part of the project I need to develop? (Elaborate all the specific tasks assigned by your group leader)</i>	<i>How do I develop it? (Specific component, API, function, etc., which needed to develop your part)</i>
<ul style="list-style-type: none"> - This project is about we develop the website that focus on football events. - We choose football event that organized in IIUM. - The website consists of all information about the events and how to register the team to the tournament. - The website also provides real time countdown to the event. 	<ul style="list-style-type: none"> - For the first project proposal 1 which is we need to design and to a mockup for the website. My leader assigns me to design and mockup 3 pages which is contact us page, sponsor page, and about Us page. - When we develop the website, which is we code the website. My leader assigns me to do contact us page and sponsor page. - We design our mockup using Justinmind software, this tools are recommended from one of our group member Bro Faied. 	<ul style="list-style-type: none"> - For contact us page, this requires to me to do some coding in JavaScript to validate the form when user enter all the information need. I make validation every user input like name, no telephone, email and so on. This is to make sure we get the right data from the user and it easier to us to contact them regarding their inquiries. To make this, use if statement in JavaScript for every input that come from. The if statement functioned when user click submit button to verify the input from user. - For sponsor page. I use JavaScript to make slide element for the image. I am using if statement to create slide show effect between each image. - For AboutUs page, I did not use Javascript, I only use CSS for the arrangement of the page and I also add link for the button to linked with contactUs page
